PoE Injector & Splitter

Power Over Ethernet

Quick Installation Guide

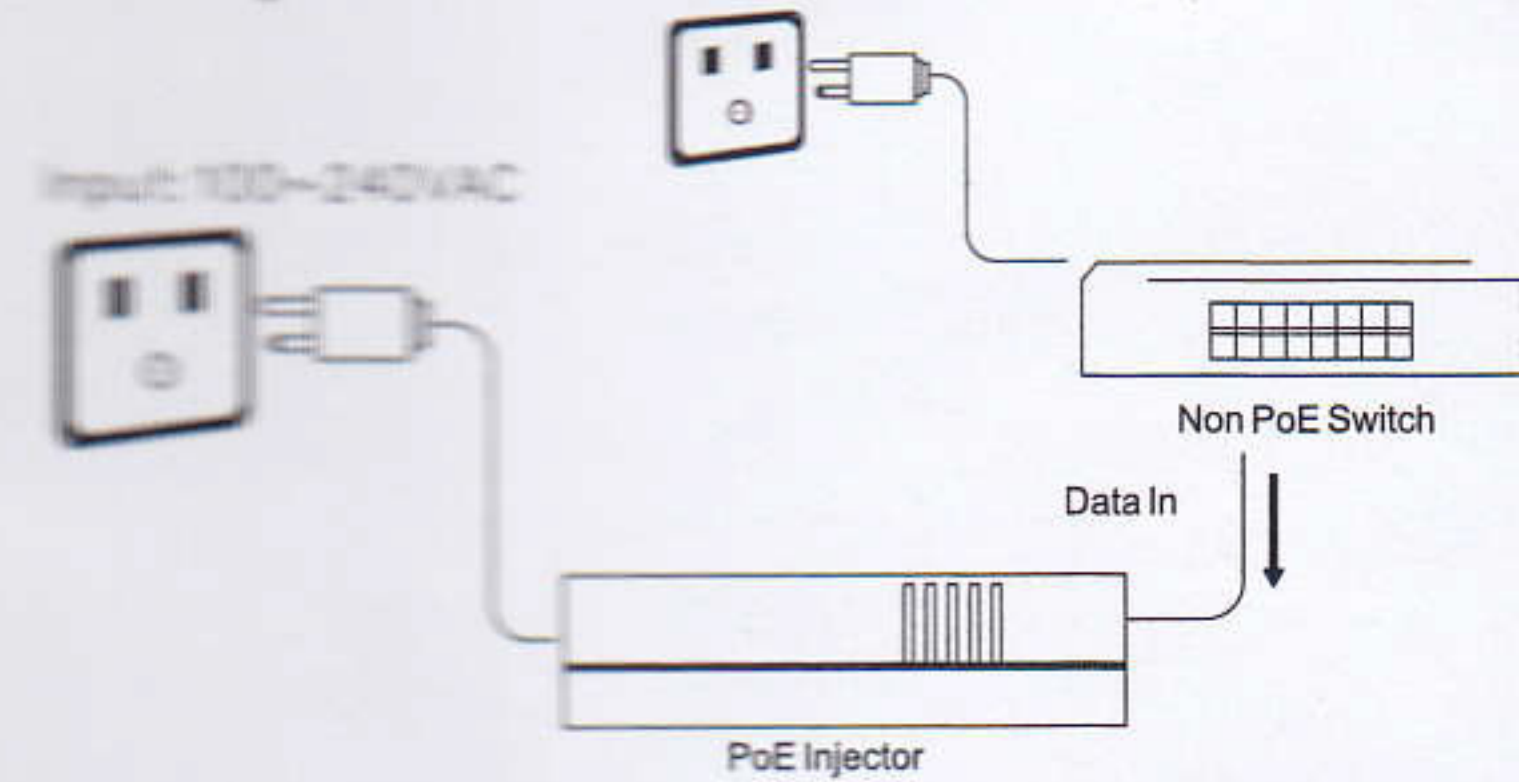

Installation Steps:

◆Step1

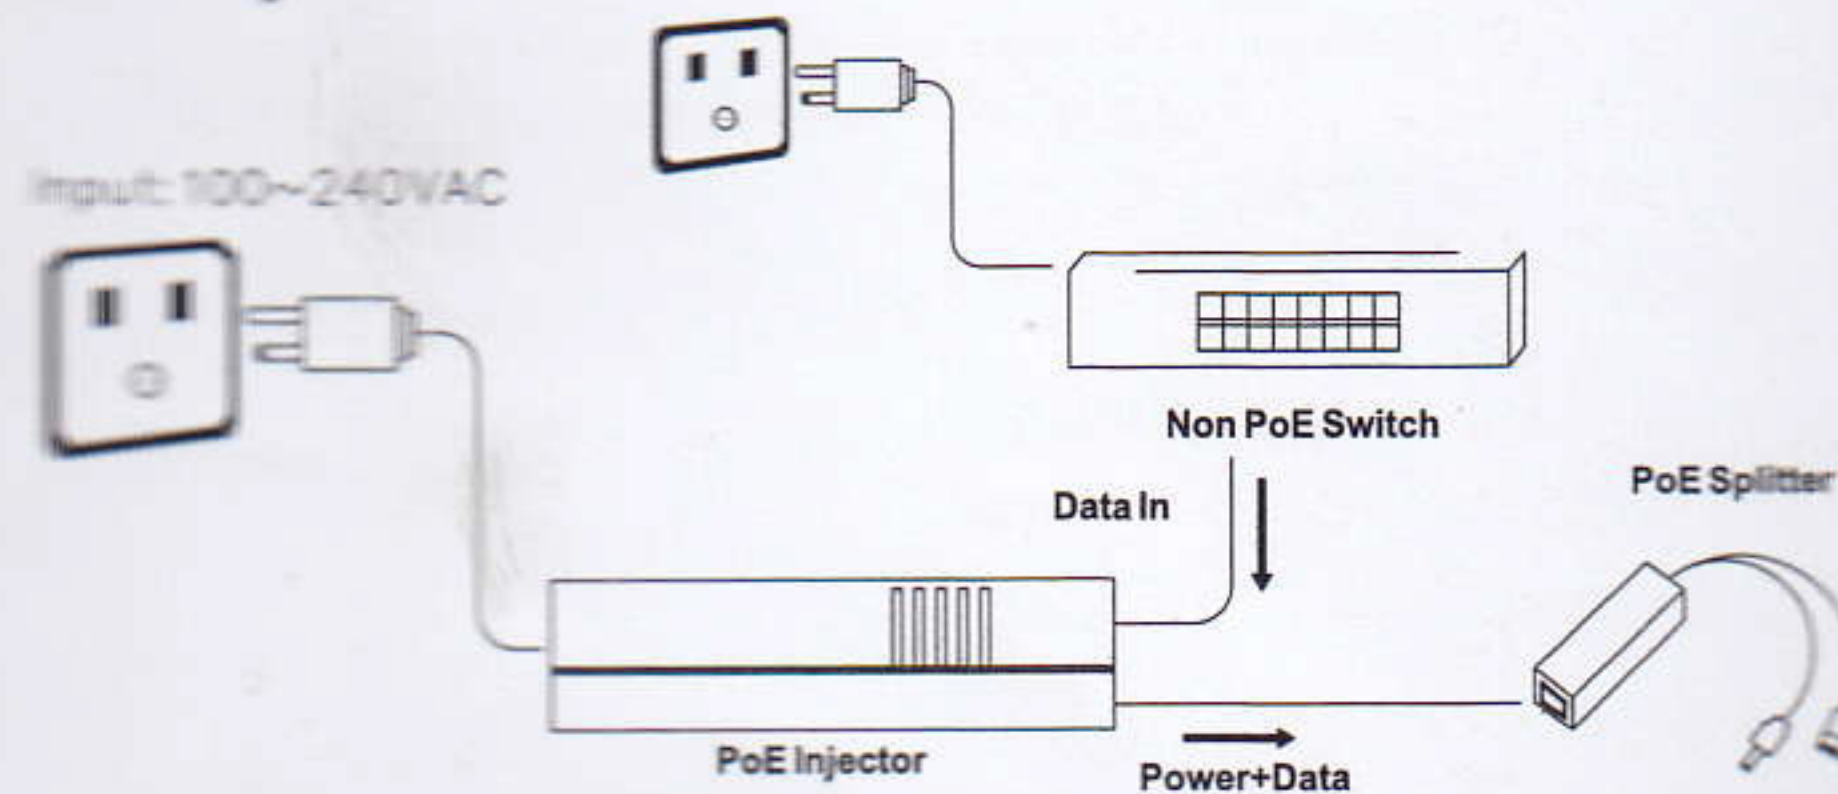

Connect AC Power cord to PoE Injector, and "Power" & PoE LED will be on.

◆Step2

Connect "Data/In" port of Injector to Non PoE Switch via Cat.5e/6/7 cable, and via PoE Splitter to transmit power and data.

◆Step3

Connect "Power+Data" port of Splitter and "P+D/Out" port of Injector via Ethernet cable, and make sure "power" LED of Splitter is on.

◆Step4

Connect "power out" cable of Splitter to power jack of the network device, and connect "Data Out" cable of splitter to RJ45 port of network device.

◆Step5

Check whether the network device is on, if not, please make sure that power is on for injector and splitter and all cables are connected correctly.
